**INFORMATION ON THE TOXICITY OF E-LIQUIDS CONTAINING NICOTINE.**

Addictive and toxic properties: symptoms of acute poisoning with small doses of nicotine (through skin absorption or inhalation of cigarette smoke) are: rapid breathing, nausea, vomiting, headaches and dizziness, diarrhea, tachycardia, increased blood pressure, sweating and salivation. After the gradual disappearance of these symptoms, there is a period of weakness. Absorption of large doses of nicotine (whether taken orally or absorbed through the skin) is initially preceded by a burning sensation in the mouth, throat and stomach, followed by the above-mentioned symptoms. This is followed by exhaustion, convulsions, decreased respiratory function, cardiac arrhythmias, motor coordination disorders and coma. eath can then occur within 5 minutes, up to 4 hours. Possible Adverse Effects: Toxic to the central and vegetative nervous system and the circulatory system. Routes of absorption: skin, digestive tract, respiratory tract.

Symptoms of acute poisoning: in the liquid form, it is easily absorbed through undamaged skin, causes increased pulse rate, increased blood pressure, heartbeat, headache, hallucinations, then a decrease in blood pressure, sweating, confusion, drowsiness, pain behind the sternum may also occur; death due to paralysis of the respiratory muscles. Ingestion causes similar symptoms of nausea and vomiting. Inhalation of tobacco smoke containing nicotine causes an increase in heart rate, increase in blood pressure, spasm of the coronary arteries with pain behind the sternum, and stimulation of the nervous system. Symptoms of chronic poisoning: addiction occurs in smokers, changes in the circulatory system [cardiovascular], changes in the central nervous system. What to do if you experience the above symptoms: If you experience any of the above symptoms or other possible side effects not listed here, discontinue use of the product. If e-liquid has been swallowed, rinse your mouth with water; if it has been splashed on the skin, wash it off with soap and water. In each of the above cases of the occurrence of the listed symptoms, malaise or other undesirable health condition, also if symptoms improve after discontinuing use of the product, consult your physician or health care professional and bring the label of the e-liquid you are using or its leaflet with

you as a reference and guidance on how to proceed.

**EQUIPMENT PERFORMANCE**

The number of puffs declared by the Manufacturer is influenced by their length, which is individual and depends on the preferences of each user; due to different usage scenarios, the number of puffs may be lower than declared.
